

## Grayteq Dashboard Quick Guide

Thank you for purchasing Grayteq Dashboard Management Insight Tool!  
Please, follow the steps below to activate Connection CAL for Dashboard.

**Step 1:** Download Grayteq Dashboard from the following link:

<http://www.grayteq.com/redirect.aspx?URLID=591>

**Step 2:** Install, then run Grayteq Dashboard;

**Step 3:** At first run, select Trial Mode in appearing window;

**Step 4:** Connect to your Grayteq DLP Security Server in Trial mode;

**Step 5:** In Tools menu, select Activate Connection;

**Step 6:** Select "I have Connection CAL" in appearing window;

**Step 7:** Click "Generate Connection String" link on the bottom of the appearing activation window;

---

**WARNING:** At this step, you are being redirected to Grayteq's Secure Activation website

---

**Step 8:** The website displays, how many Connection CALs are available for you;

**Step 9:** Set your display name on the site;

**Step 10:** Copy Server Public ID from Dashboard dialogue window into the site's Server Public ID field;

**Step 11:** Click "Generate" button;

**Step 12:** Copy Connection String generated and paste into Dashboard's matching field;

**Step 13:** Copy or enter Connection Name into Dashboard's matching field;

**Step 14:** Click "Add" to add Connection String;

**Step 15:** In Dashboard, re-login into the Grayteq DLP Security Server that will be marked "Live" from now on;

There is no need to re-create Connection String at Dashboard re-installation.
