

Grayteq Data Loss Prevention Solutions

Ultimate protection for your business data

Grayteq Data Loss Prevention Solutions provide a flexible, efficient and cost effective data protection solution portfolio, delivering streamlined monitoring, real-time policy enforcement combined with real-time alerts, comprehensive audit and forensics capabilities, dynamic searching and single-console security management. By its central management console, Security Orchestrator (SO), all Grayteq products in unlimited number of connected or separated Grayteq systems can be easily configured, managed and reported. The whole Grayteq solutions portfolio is designed and developed by using our more than two decade lasting data protection experience with the firm commitment to provide single pane-of-a-glass solution for all existing and upcoming data security challenges.

Gain incident visibility

Security Orchestrator allows you to manage all file activities and incidents network-wide, by seamlessly integrating into your Microsoft infrastructure.

Streamline remediation and reporting

Configure, manage, check status and view alerts and reports from SO or create A-level reports by Grayteq Dashboard, while quickly hand-off duties and incidents to security administrators. Automate reporting with preset, freely configurable reports that can be scheduled and set for automatic delivery in email.

Perform sensitive data searches

Security Orchestrator allows you to perform searches against all Grayteq DLP components to find sensitive data, learn how it is used, finetune rules, and validate policies on the fly.

Improve incident workflow management

Correlate incidents into SO or Dashboard. Escalate incidents through a flexible embedded case management tool and delegate responsibility for a specific incident and/or case among key users.

Get started quickly

Deploy preconfigured policies for common regulations such as application policies, data quarantines, event policies and more, while SO's wide range of built-in roles expedite setup for key team members.

About us

Grayteq was born from a firm commitment to provide superior data security products to companies and people all over the world. Since its inception, our company has passed down and expanded on its traditional strengths as an IT security software manufacturing company. Grayteq's approach to data loss prevention massively differs from any other data loss prevention manufacturers' approach in numerous aspects. Our slogan well represents our way of thinking about data loss and applicable prevention measures to stop it.
